This comparison is between the Enterprise version of Zoho Projects & BugTracker and the Premium version of MS Project Online.

SRINIVASAN VENKATACHALAM, ASSOCIATE MANAGER, ACCENTURE

"I have seen many people use Microsoft Project for planning, but when it comes to execution, it makes you follow so many steps that life becomes difficult for everybody. If you force people to log too much data, I find they end up filling junk just to please you. And junk data is worse than no data!"

MORE CUSTOMERS

Why favor Zoho Projects over Microsoft Project?

Interact more

Collaborate with a set of tools that give you the social network feel. View latest updates with interactive feeds, communicate faster with personal or group chats, debate and discuss in forums and organize and manage information using pages.

Organize better

Lend structure to your work with our predefined hierarchy. Break your complex projects into simple, more manageable tasks. Group similar tasks into task lists and associate them to milestones.

Go Mobile

With the iPhone and Android mobile apps, manage projects even as you are on the go. Receive notifications, update a status, create tasks, log hours in a timesheet, file a bug or upload a document anytime, from anywhere.

Get the Zoho advantage!

Zoho is the maker of the broadest suite of business apps available online today. Extend the possibilities of a project management system, like no one else can, by contextually combining it with Zoho Books, Zoho Docs, Zoho Reports, and Zoho Chat.
